

Certification of Achievement

This is to certify that

Student1314836	ONI OLUWAFERANMI OLADOTUN
Student1321704	AFIAH ETORO-ABASI MICHAEL
Student1317093	EZEOLIAKU MIRACLE IFUNAYA

Successfully designed SMARTSTORE website.

This project is now done and

Submitted by :

Student1314836 OLADOTUN	ONI OLUWAFERANMI
Student1321704 MICHAEL	AFIAH ETORO-ABASI
Student1317093 IFUNAYA	EZEOLIAKU MIRACLE

6. User guide

7. Developer's guide

I. Acknowledgement

All thanks to the Almighty God for the gift of life, knowledge and insight.

Our great appreciation also goes to our Faculty/Instructor, Mr. Abiola for his support and guidance towards the successful completion of this project.

To all staff and management of APTECH Computer Education, Surulere Center, Lagos, Nigeria, thank you for your support and assistance.

2. E-project Synopsis

Incorporating storage into a home is very much necessary. Staying organized is not easy, and allowing a buyer to understand the value of efficient storage solutions can make the difference between a haphazard home and an orderly masterpiece.

“Smartstore” is a company selling wardrobe and other home storage products specially space savers. They sell variety of products suiting every requirement and various sizes and qualities.

This project was implemented using our knowledge of HTML5, CSS and JavaScript.

3. E-project Analysis

The purpose of this document is to present a detailed description of the Online Shopping Website, titled SMARTSTORE.

This document explains the purpose and features of the website, the interface of the website, what the website will do and the constraints under which it must operate.

Contents of the website include a ‘**home page**’ (index.html) consisting of the following Navigation menu:

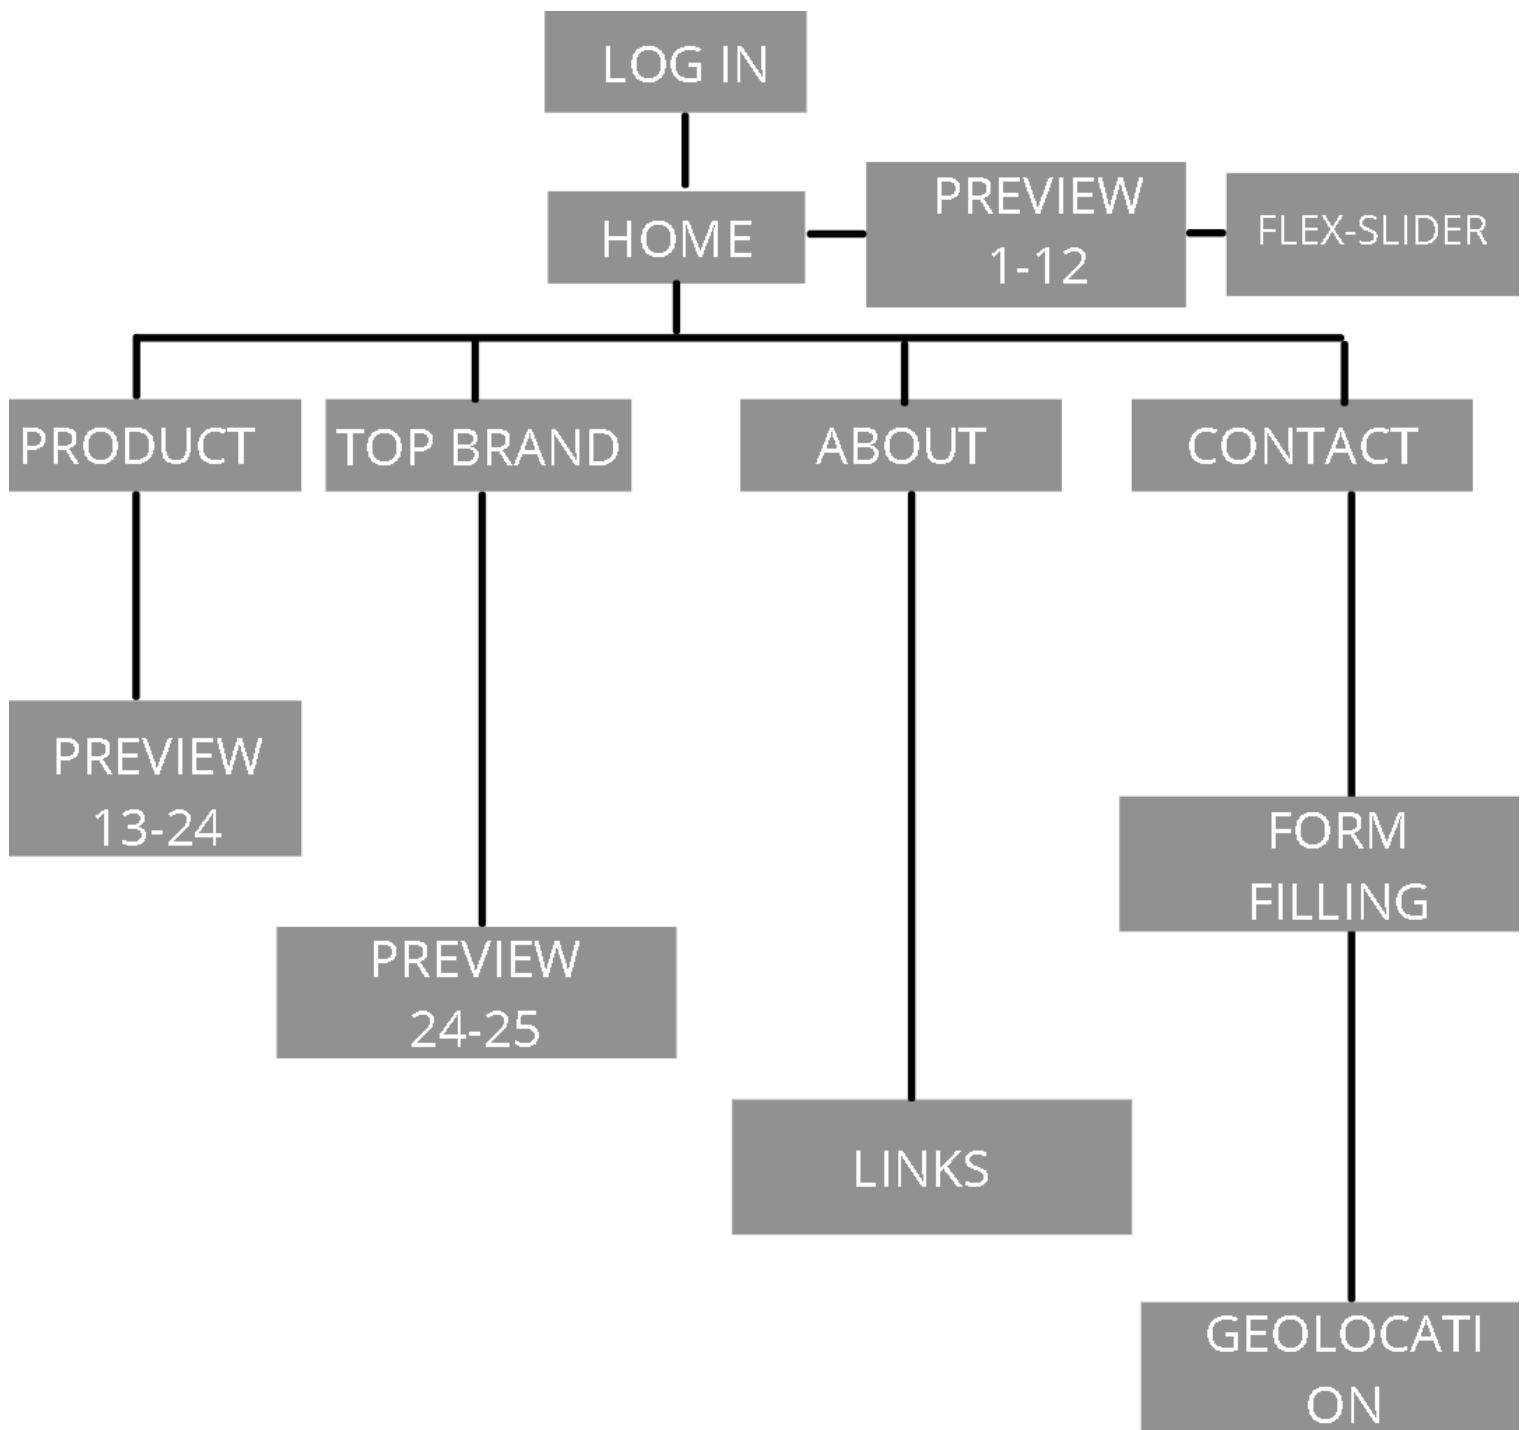

1. HOME
2. PRODUCTS
3. TOP BRAND
4. SERVICES
5. ABOUT USs

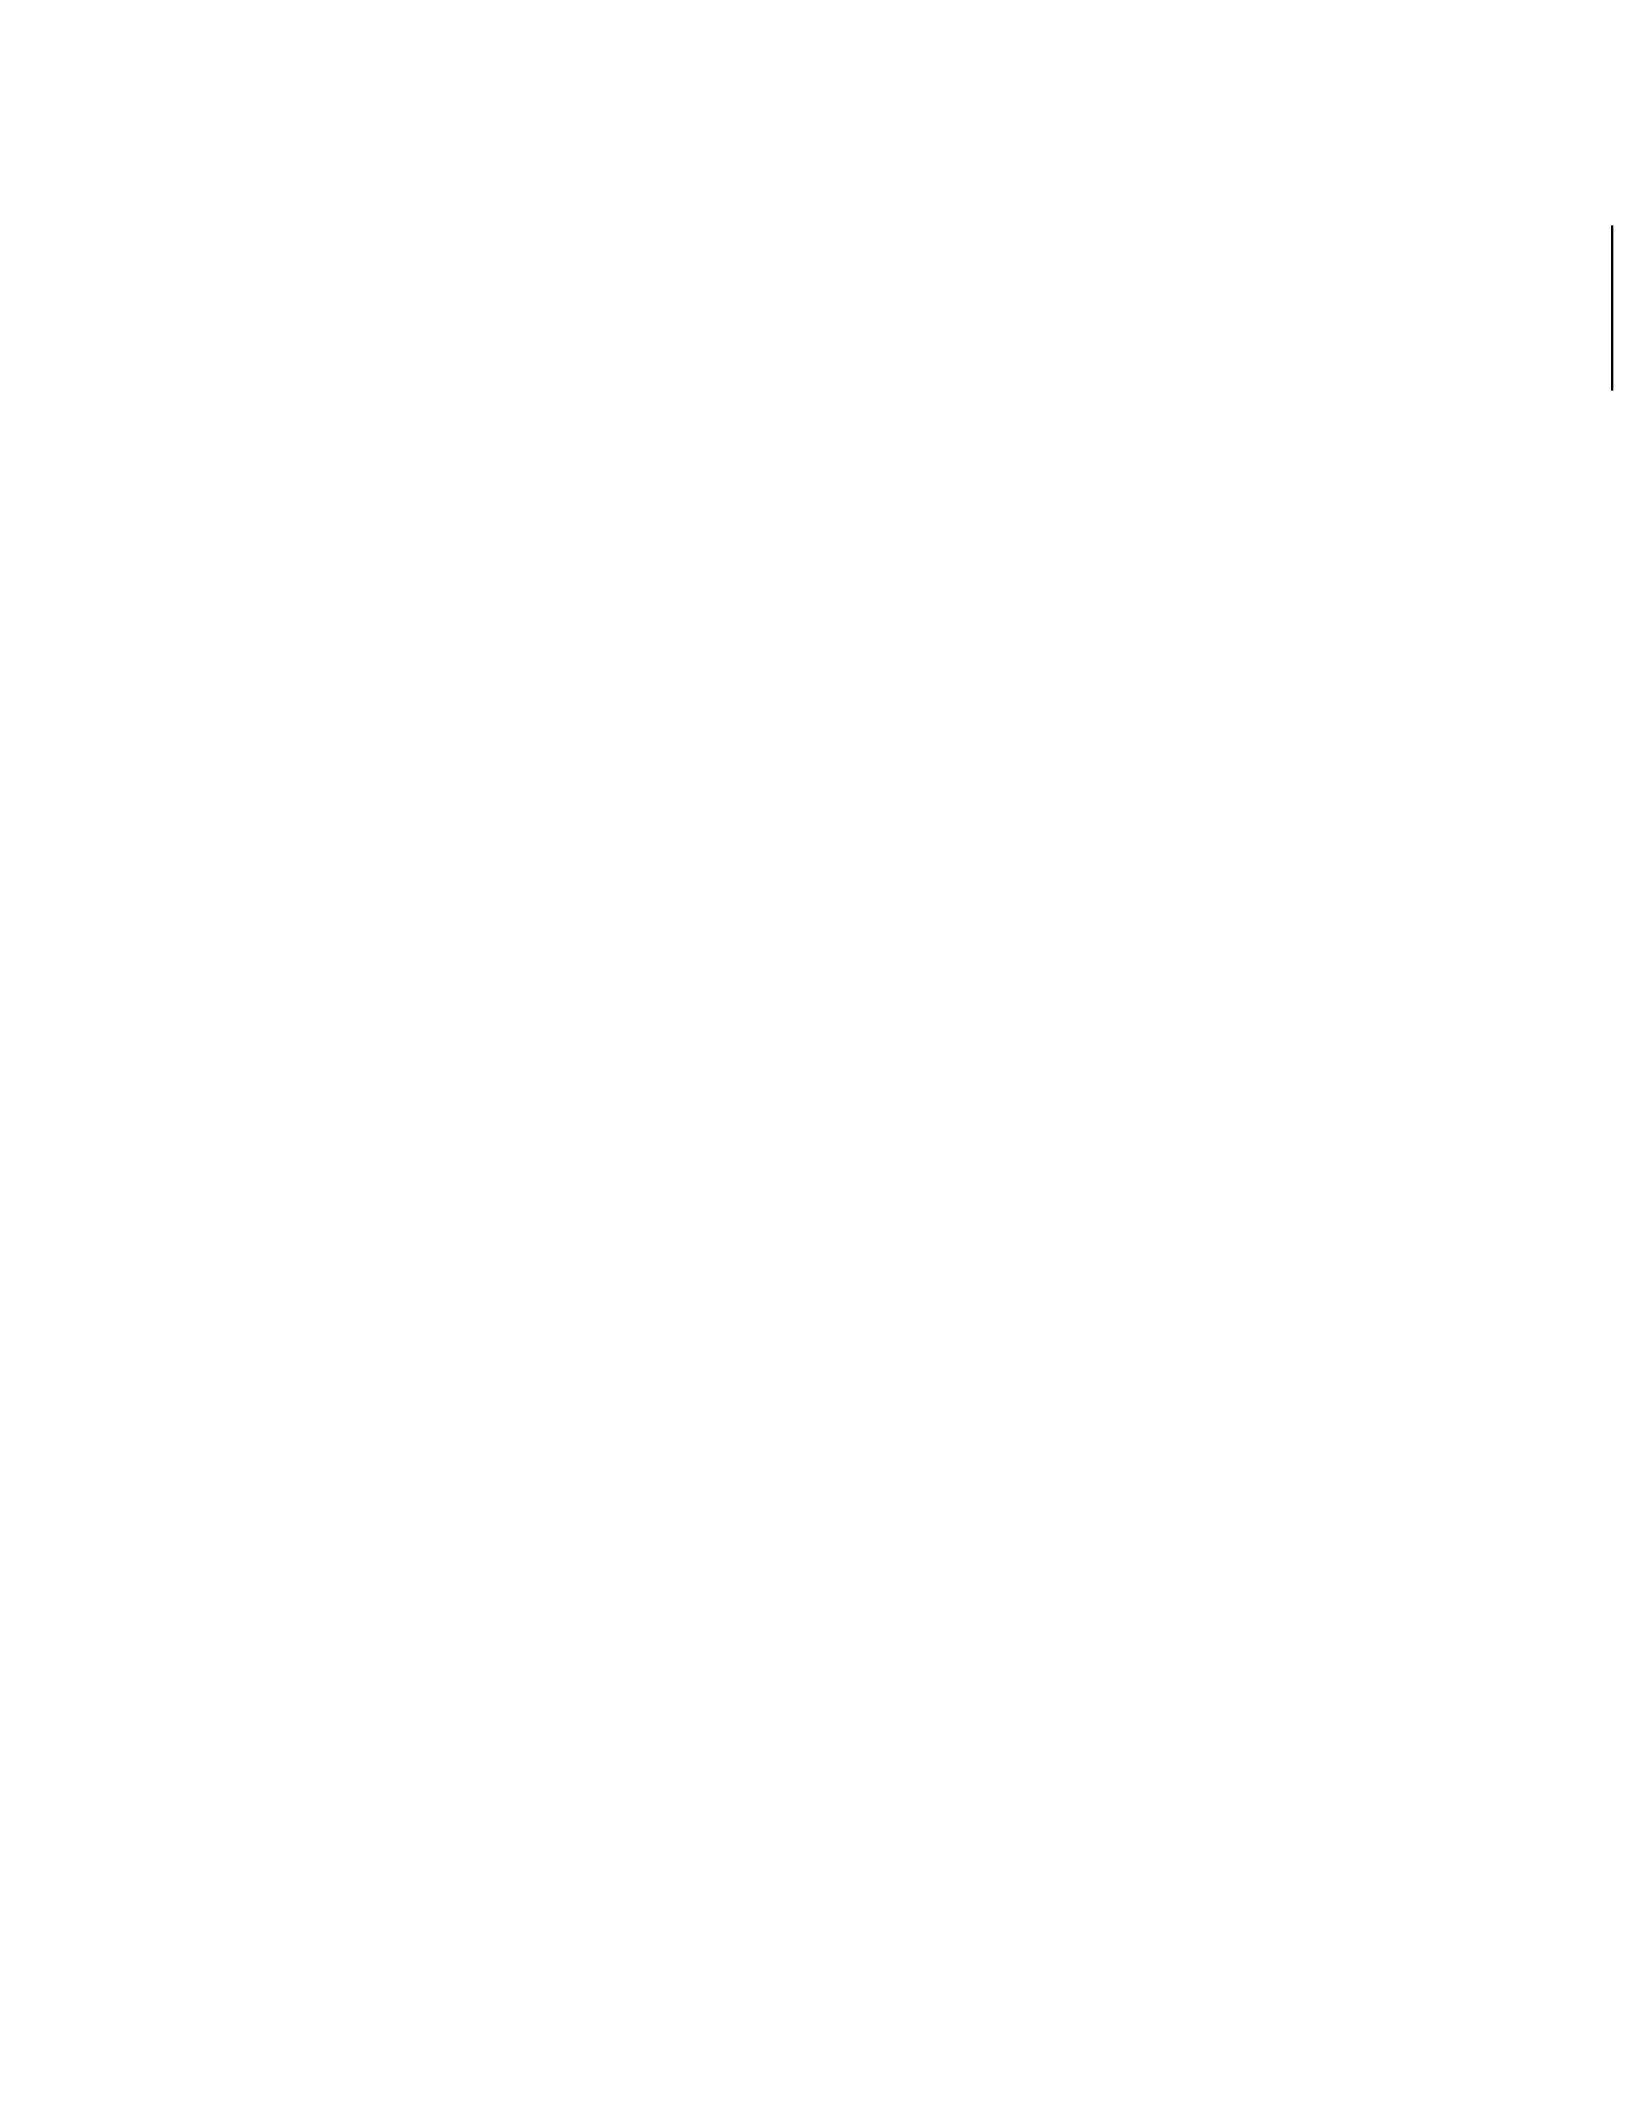

6. CONTACT

NAVIGATION MENU:

1. **Home:** The home page consists of the menus such as products, top brands, services, and so on. Here the website logo is also display at the top left corner of the website.
2. **Products:** The products page allow users to view available products and their prices. It displays the availability of the goods, stock, price, discount, product description, delivery and return policies.
3. **Contact :** The contact page displays the **E-mail address, address and contact number** of SMARTSTORE. Here, users can contact us if they have any requests, suggestions or complains. It also displays Google Maps (Geolocation API) and the email address which when clicked will invoke the local mail client from where they can send an email.

4.0 E-project design(Data flow diagram)

- Products
- Services
- About
- Contact .

Introduction to the SMART STORE

Website

SMARTSTORE provides an easy shopping facility to the customers, wherein they can sit at one place and get their products anytime, anywhere 24/7.

This document explains the purpose and features of the website, the interface of the website, what the website will do and the constraints under which it must operate.

The website provides features such as:

- A Product page where Varieties of goods like furniture, cupboards, storage savers and many other products are being displayed.
- A contact (feedback) link where customers can communicate with the web developers about observations and questions relevant to the website.

This manual explains the many ways in which to use the site in order to get the most out of our resource. For all further questions, please get in touch with the development team – the contact details can be found at the contact us page or through the contact us navigation menu as stated above.

Home Page

The home page is the first page displayed on the website. It consists of a Navigation menu at the very top of the home page. The navigation menu contains the following:

1. PRODUCT.
2. SERVICES.
3. ABOUT US.
4. Contact .

PRODUCT Page

The product page is where the products are displayed with their prices, also descriptions, more details about the product and delivery & return policies.

Contact us Page

The contact us page link takes the user to a page within the website where users can send their comments, make enquiries and share their observations about the website with the developers. This page also displays a Google map of the operational station of the development team (Aptech building) and the address.

It is important to note that the Google map facility is only available within the website when the user is connected to the internet.

6.0 Developer's Guide

SMARTSTORE provides an easy shopping facility to the customers, wherein they can sit at one place and shop online anytime, anywhere 24/7.

If a developer wants to change any content of the website, the developer can access the index page and other html pages within the website.

The source code has been commented in details in order for any developer going through the code to easily understand and modify.

The project was created using HTML5, CSS, and JavaScript.

Visual Studio Code was used as the HTML text editor and it has been tested across all leading browser and various screen sizes.
